

## Short manual of ***Fulvic Ultra***

*Fulvic Ultra is a product of modern plant fermentation biotechnology, which results in absolute water solubility.*

It can be compounded and dissolved with trace elements (for example Fe, Cu, Mn, Zn, B) and macro elements (for instance NPK).

### ***COMPOSITION:***

- Fulvic Acid:95%
- pH value:5-7
- Moisture:3%
- Powder

### ***APPLICATION:***

Fulvic Ultra is mainly used in agricultural crops, fruit trees, landscaping, gardening, pastures, grains, horticultural crops, etc.

Foliar application: 1kg-2kg per hectare.

Root irrigation: 1.5kg-4kg per hectare.

Dilution: foliar spraying: 1:1500-2000, root irrigation: 1:1200-1500.

We recommend 3-4 applications every season according to the crop season.

### ***BENEFITS:***

- Broad spectrum plant growth regulator.
- Proper control of crop leaf stomatal openness.
- Reduces transpiration, an important element to withstand drought.
- Helps build resistance to arid, windy conditions.
- Improves stress tolerance of crops.
- Improves the quality of crops.
- Stimulates crop growth.
- Enhances root activity.
- Improves various enzyme activities.
- Increases chlorophyll.
- Improves the quality of fruit.
- Creates a beneficial synergism with some non-alkaline pesticides.
- Increases efficiency of fertilizer use.
- Prevents and treats yellow wilt of cotton and improves cotton yield.
