

Short Manual
of
Volcanix[®] Humic Pro NPK
Effective feeding and innovative protection
Feeds plants and the soil.

FEATURES OF THE Volcanix[®] HUMIC PRO NPK:

- high content of macro and microelements,
- high efficiency of the use of particular elements by plants,
- full chelation of microelement elements ensures their high uptake and use by plants.
- protective properties - hampering and inhibiting the development of pathogens,
- easy to use (after dilution with water they are clear, do not clog nozzles and sprayer lines.

HOW TO USE?

The optimal conditions for foliar nutrition are: high humidity and temperature within 10-30°C. On sunny days, spraying should be done early in the morning or late in the evening. Spraying performed at a temperature higher than 30°C and low humidity, causes salt crystallization on the leaves and fruits, which significantly reduces the effectiveness of spraying.

HOW MUCH DO YOU NEED?

First treatment (2l-5l / 1ha) – at start of the season it builds a strong plant root system and plant resistance to stress conditions.

Second treatment (2l-5l / 1ha) – beginning of vegetation it enhances the generative development of plants, what affects final quantity and quality of harvested crops

250 l of water+5 l of Volcanix[®] HUMIC PRO NPK* = 255 LITERS /1ha

*orchards

500 l of water+10 l of Volcanix[®] HUMIC PRO NPK = 510 LITERS /1ha

Volcanix[®] HUMIC PRO NPK can be used several times during the growing season. The concentration and frequency of treatments depends on soil fertility, nutrient deficiency and the condition of plants.

COMPOSITION

- 80% organic substances (includes 50% Humic Acids)
- NPK>20%
- Natural amino acids
- Substances and enzymes that stimulate growth

STORAGE

Volcanix[®] Humic Pro NPK should be stored in an origin package, at a temperature not lower than 5°C and not higher than 40°C in a place inaccessible to children. Protect from the sun. Not to be combined with plant protection products, mineral fertilizers and other chemical synthesis products.

PACKING:

- 1-litre bottles
- 5-litre bottles
- 1000-litre tank
