

Short Manual of ***Multi Biostimulant***

Multi Biostimulant is a kind of multi-sourced biostimulant.

With high-quality mineral-sourced potassium fulvic, plant-derived enzymatic amino acid, enzymatic alginic acid, etc. and the use of the international advanced MRT (molecular recombination technology) active functional groups can be organically combined. Meanwhile compound with large, medium and trace elements. Organic and inorganic matters work together to improve soil quality, crop resistance and stimulate crop growth.

COMPOSITION:

- Mineral source Fulvic acid:40%
- Seaweed Extract:10%
- Polypeptide:10%
- N:4%
- P₂O₅:6%
- K₂O:14%
- EDTA-Ca:0.3%
- EDTA-Mg:0.1%
- EDTA-Zn:0.2%
- EDTA-Fe:1%
- EDTA-Mn:0.05%
- EDTA-Cu:0.05%
- B:0.8%
- Mo:0.05%
- pH (1:250 dilution):7.5

APPLICATION:

Vegetables and fruits: 6kg-15kg per hectare, combined with conventional fertilizers, use flushing, spraying or drip irrigation, etc., every 7-15 days, adjust the amount of use according to the growth situation.

Fruit trees: 15kg-30kg per hectare, combined with conventional fertilizers, use flushing, spraying or drip irrigation, etc., every 7-15 days, adjust the amount according to the growth situation.

Field crops: 0.3kg-1kg per hectare, evenly sprayed, 7-15 days apart.

Think about Our Planet

BENEFITS:

Strong rooting effect – the product is rich in energy active groups such as hydroxyl, carboxyl, alcoholic hydroxyl and phenolic hydroxyl. The production process of enzymatic hydrolysis retains active molecules, for instance vitamins and mannitol, which stimulates the root tip to secrete growth factors that increase root hairs.

Stress resistance and growth promotion – the product stimulates the production of phenols and other stress resistance factors in crops to maximize the effects of anti-freezing, drought endurance and alkali salt resistance. Then it stimulates crop cells, promotes growth and reduces the impact of damaging environment on crops.

Increasing yield and quality – multi-source organic biostimulants combined with inorganic nutrition work synergistically to increase harvest and its quality, make the fruit shape better, deacidify, sweeten and get it coloured earlier. Thanks to that the fruit can be marketed in advance.

Packaging:

- 1kg bag
- 5kg bag
- 20kg bag
- 1000kg bigbag
