

Short manual Of ***Humic Ultra***

Humic Ultra is a type of Potassium Humate organic fertilizer.

It can be used for foliar spraying and drip irrigation. This product has the necessary nutrients to improve crop quality and increase yield in both flake and powder form.

COMPOSITION:

- Humic Acid (dry basis):80%
- Potassium (K₂O):10%
- Water solubility:100%
- Flake

APPLICATION:

Humic Ultra is mostly used in agricultural crops, fruit trees, landscaping, gardening, grains and horticultural crops.

Soil application: 8kg-12kg per hectare.

Irrigation: 8kg-12kg per hectare.

Foliar application: 5kg-8kg per hectare with the dilution rate of 1:600-800.

BENEFITS:

- Increases organic matter of soil.
- Improves crop respiration and photosynthesis.
- Improves potash fertilizer utilization.
- Slows decomposition to increase the release of potassium.
- Improves the content of available K.
- Long-lasting and fast-acting.
- Enhances water holding capacity of soil.
- Reduces soil erosion and improves workability of soil.
- Regulates the release of nutrients.
- Improves the quality of agricultural crops.
- Improves efficacy of Herbicide.
- Improves the efficiency of fertilizer.
